

# **Canadian Welding Association Journal**

## **EDITORIAL PLAN**

The editorial content of the Canadian Welding Association Journal is intended to communicate the knowledge and values of the members of the Canadian Welding Association to the Canadian welding community through a high-quality publication dedicated to the welding profession. The publication highlights Canadian welding practices, professionals, education and research. It presents new and informative welding-related articles on technology, technique and education as well as research papers that will interest and inform Canadian welding professionals. The Journal is published quarterly. Our publication schedule requires a lead time of approximately two-and-a-half months for submission of articles and papers. We will only specify the theme for the cover story. Other articles may or may not match the cover-story theme. All other articles will be assessed by the Journal Committee as to their suitability for publication. The cover-story themes and editorial submission deadlines for the future issues are:

- |               |                     |                   |
|---------------|---------------------|-------------------|
| • Spring 2010 | Welding Safety      | March 1, 2010     |
| • Summer 2010 | Design              | June 1, 2010      |
| • Fall 2010   | Education           | September 1, 2010 |
| • Winter 2011 | Maintenance welding | December 1, 2010  |

## **INFORMATION AND REQUIREMENTS FOR AUTHORS**

The *Canadian Welding Association Journal* is written for and distributed to leading welding professionals across Canada. The Journal accepts suitable articles for publication. Authors are not paid for their material; however, the Journal's reach to a wide readership of leading industry professionals and its long life on the CWA website ([www.cwa-acs.org](http://www.cwa-acs.org)) provide author recognition. Articles should be between 700 and 1,500 words in length. Longer articles will be considered. Articles and papers that exceed this length may be published in summary in the Journal and in full on the website. Supporting graphics and pictures where appropriate are encouraged. Authors should indicate the issue for which the article is submitted. Articles will be presented to CWA's Journal Committee for review and consideration for publication. The Journal Committee will also consider proposals for articles.

**Articles and proposals for articles must be submitted by email to [info@cwa-acs.org](mailto:info@cwa-acs.org) as MICROSOFT WORD files. PHOTOS AND GRAPHIC ITEMS MUST ACCOMPANY THE ARTICLE AS SEPARATE FILES. They may also be embedded in the article for clarity in positioning and titling.**

The article must be accompanied by the following:

- Author's name, title and company (if applicable), address, phone number and email address.
- Notification of previous publication of the article.
- **Graphics and pictures in high-resolution image files separate from the file containing the text (eps format preferred, jpeg format very acceptable - minimum resolution 300 dpi).**
- **Please use filenames that identify you, the article, the content and the graphics. (i.e. smith\_tig\_welding.doc, smith\_figure\_1.jpg NOT cwa\_welding\_article.doc)**

**By submitting the article and images, the author grants CWA the right to publish the article in the *Canadian Welding Association Journal* and for other uses as CWA deems appropriate. All usages will be for the benefit and promotion of the Association. Images and articles, in whole or in part, may be used in promotional material for the Association. This in no way precludes an author from granting permission to another publication to reprint an article so long as the *Canadian Welding***

***Association Journal* is credited with previous publication.**
