ESAB HANDYPLASMA® 380 CUTTING PACKAGE PROVIDES POWERFUL CUTTING PERFORMANCE ON A BUDGET

Florence, SC – ESAB's HandyPlasma 380 is an economical plasma cutting package with the power to cut 3/8 in. (9.5 mm) and sever 1/2 in. (12.7 mm). This tremendous cutting value is contained in a compact portable design, weighing just 22 lbs., that can go almost anywhere. The system is value-priced to provide powerful performance on a budget.

A compact, simple torch with ESAB's patented XT nozzle offers easy access to tight spaces and good visibility. Other features include a template following feature, side-mounted pressure gauge, externally mounted and adjustable air regulator/filter, and automatic air purge when the unit powers on. The variable output feature allows the operator to turn down the output for precise cutting on thin materials.

This 208/230 VAC single phase machine comes complete with torch, spare parts, air filter/regulator, input power cord with plug, and work cable with clamp. The system arrives fully assembled and ready to cut. Output is 30 amps @ 35% duty cycle.

With more than 100 years of experience, ESAB Welding & Cutting Products is one of the world's largest and most knowledgeable manufacturers of welding and cutting equipment and welding filler metals. To ensure customer satisfaction, many ESAB products carry a 100% Satisfaction Guarantee. Recognized as the technological leader in the industry, ESAB is committed to providing customized solutions for its customers.

For more information on the HandyPlasma 380, visit www.esabna.com or call 1-800-ESAB-123.
