MAY 2008

FOR THE FIRST TIME, LINCOLN ELECTRIC WILL EXHIBIT AT THE UPCOMING 2008 ATLANTIC CANADA PETROLEUM SHOW

Toronto – For the first time, Lincoln Electric Company of Canada will be exhibiting at the upcoming 2008 Atlantic Canada Petroleum Show (www.petroleumshow.com/acps), on June 18th – 19th at the One Mile Centre, in St. John's, Newfoundland. Come visit us in our **Booth# 1112!**

Our diverse line of welding and automation equipment, consumables, and, environmental systems will be showcased. Lincoln Electric will be displaying their latest equipment and consumable technologies for the energy & offshore construction industries. This includes our patented Power Wave[®] and Surface Tension Transfer (STT[®]) technology for carbon and alloy pipe welding. A new revolution in Submerged Arc Welding can be seen with our Power Wave[®] AC/DC 1000 power source and Cruiser DX tractor. Production Monitoring, an Internet based welding productivity and troubleshooting tool, is available with all of our Power Wave[®] welding equipment. We will be showing our premium UltraCore[®] carbon and low alloy steel flux-cored wires along with our full line of carbon, stainless, and alloy steel welding consumables. Come see for yourself how our wide range of product lines can provide uniquely tailored solutions to your company's or individual welding projects. No matter what your industry, our welding expertise will translate into solutions that work specifically for your business needs.

Lincoln Electric Company of Canada is a wholly owned subsidiary of Lincoln Electric Holdings, Inc, Cleveland, Ohio, the world leader in the design, development and manufacture of arc welding products, robotic arc welding systems, fume extraction equipment, plasma and oxyfuel cutting equipment and has a leading global position in the brazing and soldering alloys market. Visit www.lincolnelectric.ca for the latest welding news, products and promotions.
