### Investing in the future of our Welding Industry

Our executive is currently examining ways that we can facilitate investment in this area. Our goals are to make young people aware of the opportunities that are available in the welding industry, educate them on many of the misconceptions related to our industry, provide local high schools with the resources to effectively teach their students, and provide rewards and incentives for young people who excel in their training in this field.

This is a large challenge and will require assistance from all areas of our local welding industry to be effective in developing skilled employees for our industry in the future. *If your organization has time, equipment, or resources to assist with these measures, please contact any member of our executive committee.* A listing can be found at the following link: [http://www.cwa-accs.org/winnipeg/CWA\\_WinnipegChapterBoard.pdf](http://www.cwa-accs.org/winnipeg/CWA_WinnipegChapterBoard.pdf)
